“ We, Infodation, are more than a software company.

01 / 08

About Infodation Vietnam

Infodation is a global software development company headquartered in the Netherlands, with a strong presence in Vietnam. We design and deliver innovative technology solutions that empower businesses to innovate, optimize and grow sustainably.

17+	2	4	ISO 27001
years serving the European market	offices — Netherlands & Vietnam	global technology partner networks	certified information security

We embrace **Agile** principles with a strong focus on **Scrum**. Achieving Scrum Maturity Level 3 reflects our consistent practices, collaborative culture and dedication to delivering value through continuous improvement.

Vision

To make complex technology feel simple, connected and human — empowering organizations to grow with confidence.

Mission

We turn complexity into clarity by building intelligent integrations that drive growth and collaboration.

Technology Capabilities

With more than 17 years of experience developing software for the European market, Infodation masters a comprehensive technology ecosystem spanning Cloud, Big Data and Artificial Intelligence.

AI-Driven Mindset

Beyond integrating LLMs (GPT, Gemini, Claude), we apply AI to secure systems, optimize development processes and deliver smarter SaaS solutions built on reliability and performance.

Cloud Infrastructure

- **AWS** – SaaS & microservices
- **Microsoft Azure** – cloud contact center & strategic partner
- **Google Cloud** – storage & containerization

High Availability and flexible scalability across all three platforms.

Big Data & Stream Processing

Apache Kafka / RabbitMQ for real-time data processing, combined with **Google BigQuery / AWS Redshift** as large-scale data warehouses for in-depth Business Intelligence.

Diverse Databases

- **SQL** (PostgreSQL, MySQL, MS SQL Server) for finance/ERP
- **NoSQL** (MongoDB, DynamoDB) for unstructured data
- **In-Memory Caching** (Redis) for speed at the scale of millions of users

ARTIFICIAL INTELLIGENCE (AI & LLMS) Deep integration of leading large language models (**GPT, Gemini, Claude**) to build **AI Agents**, computer vision (**OCR**) for automated document extraction, and intelligent trend forecasting (**Predictive Analytics**).

R&D and AI Innovation

At Infodation, the R&D department and the Dedicated AI Team form the technology core — continuously experimenting with and applying the most advanced solutions to give clients a decisive competitive advantage.

Research & Development Center

Mission: Stay ahead of emerging technology trends, experiment with cutting-edge software architectures and optimize product development processes.

Research focus

- Complex **Middleware** solutions that optimize system integration.
- Design automation for engineering/construction via advanced APIs (**Autodesk, BIM, Revit**).
- Proprietary foundation frameworks that shorten project delivery by **40–80%** while meeting European security standards.

Dedicated AI Team

Mission: Bring AI into real-world operations — turning it from a concept into tools that generate revenue and cut costs.

Hands-on capabilities

- **Mastering & fine-tuning LLMs** — deploying, training and adapting OpenAI, Gemini and Claude models through fine-tuning and RAG.
- **AI Agent development** — a new generation of Virtual Employees that automate complex business processes and support real-time decisions.
- **Intelligent data processing** — Computer Vision, OCR and high-accuracy Predictive Analytics.

40–80%
faster project delivery with proprietary frameworks

RAG
retrieval & fine-tuning for OpenAI, Gemini, Claude

BIM
design automation with Autodesk & Revit

> *"AI isn't the future — it's what we build today.*

Technology Partners

Our partnerships with the world's leading technology platforms give us early access to core technologies, advanced APIs and ecosystems — and give our clients proven, future-proof solutions.

Microsoft Partner

Status: Official Microsoft technology partner.

Highlight: Selected member of the **Azure Communication Services Technology Adoption Program (TAP).**

Early access to Microsoft's core technologies to build market-leading
Unified Communications and cloud contact center solutions.

Amazon Web Services (AWS) Partner

Status: AWS Partner Network member.

Proven capability in cloud architecture design, digital infrastructure transformation and operating large-scale SaaS systems — with High Availability, flexible scalability and optimized costs.

Autodesk Developer Network

Status: Official member of the Autodesk Developer Network.

Direct access to Autodesk resources and advanced APIs **(Revit, AutoCAD, BIM)** to build design-automation and supply-chain software for industry and construction.

Bentley Developer Network

Status: Official member of the Bentley Systems Developer Network.

Direct access to Bentley's tools and APIs to develop solutions for civil construction, structural engineering and urban infrastructure — from design to operation.

What our partnerships mean for you

Early access
to Microsoft core technologies via Azure TAP

Direct APIs
Autodesk & Bentley engineering ecosystems

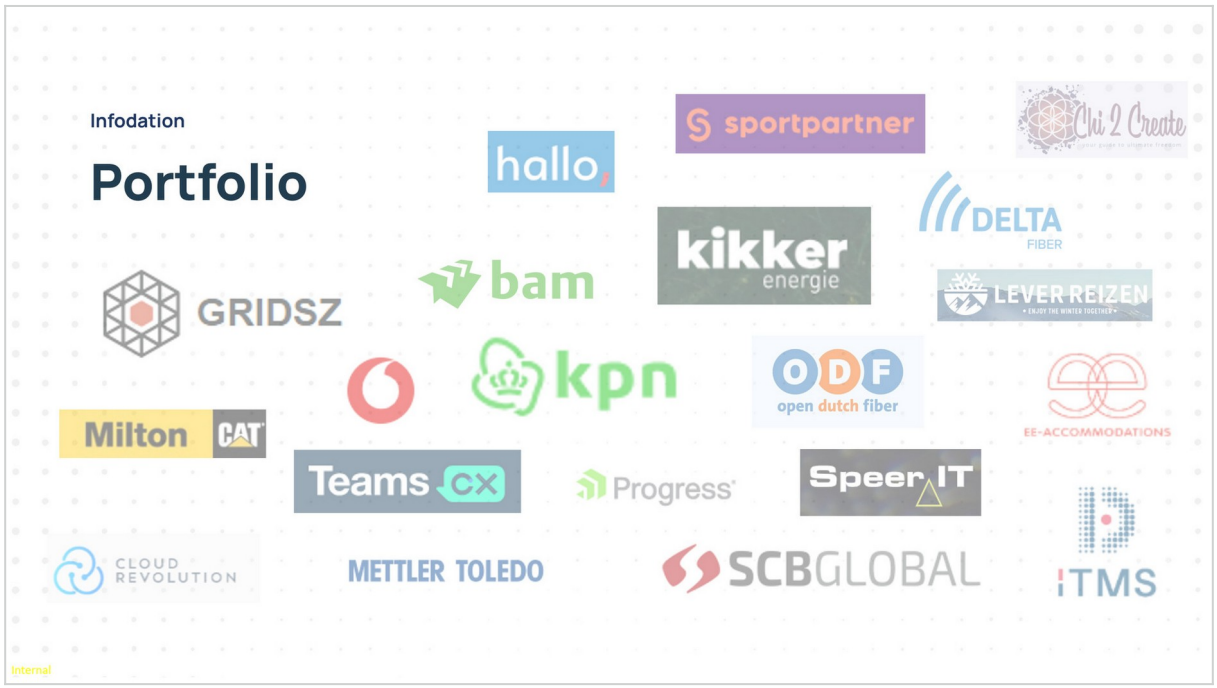

Proven cloud
AWS & Azure scale with High Availability

Selected Projects

A selection of platforms that Infodation has architected, built and optimized — running in production for market leaders in Europe and the US.

Gridsz

gridsz.com

THE NETHERLANDS

Leading SaaS platform for the telecom industry in the Netherlands

10M+
connections managed

500+
platform users

30–60%
lower operating costs

Gridsz is a large-scale SaaS platform architected and developed end-to-end by Infodation. It has grown into the **leading technology platform** in the Netherlands for automating operational processes and managing complex telecom and fiber-optic network infrastructure. It is the operational backbone of groups such as **Open Dutch Fiber**, **Delta Fiber Network** and **BAM Telecom**.

CORE SOLUTIONS

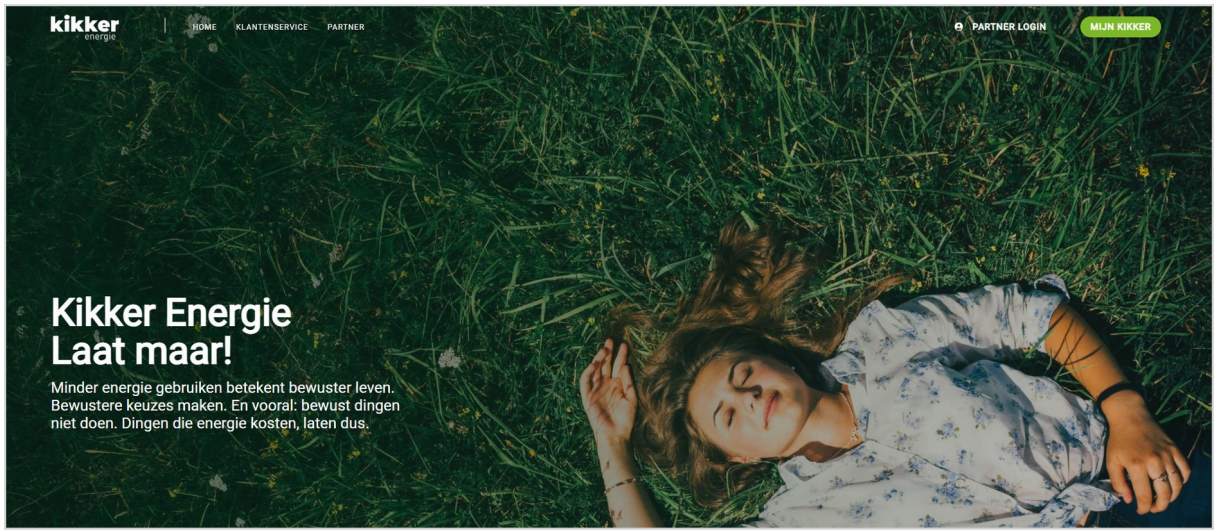

- Standardized processes based on the international **eTOM Framework** — from infrastructure checks and order processing to field-contractor dispatching and real-time incident management.
- **Big Data** processing synchronized across departments, ensuring complete accuracy.
- Meets stringent European technical standards and holds **ISO/IEC 27001** security certification.

IMPACT Turning complex platform concepts into market-leading commercial products — helping large enterprises reduce operating costs by 30–60%.

Kikker

kikker.nl

THE NETHERLANDS

Smart energy management & pricing platform

Kikker is a breakthrough SaaS platform in the Dutch energy sector, co-architected and fully developed by Infodation. It automates the entire process from consumption metering, cost calculation and **billing** to energy trend forecasting for households and businesses — helping suppliers optimize operations, manage cash flow and adapt to Europe's volatile green energy market.

CORE SOLUTIONS

- **Big Data processing** — collecting and processing real-time consumption data from millions of smart meters.
- **Complex financial calculation** — continuously changing energy prices, cash-flow reconciliation and automated invoicing with complete accuracy.
- **Operational optimization & forecasting** — analytics modules that forecast demand and optimize the grid, reducing supplier risk.

IMPACT Mastery of next-generation architectures, Big Data and rigorous pricing algorithms — to European quality standards.

EE-ACCO

ee-acco.nl

THE NETHERLANDS

Smart accounting automation & financial management platform

EE-ACCO is a specialized SaaS platform built end-to-end by Infodation, from architecture to software. It is a trusted solution in the Netherlands that helps businesses and accounting firms automate accounting, optimize cash flow and comply with demanding European regulations.

CORE SOLUTIONS

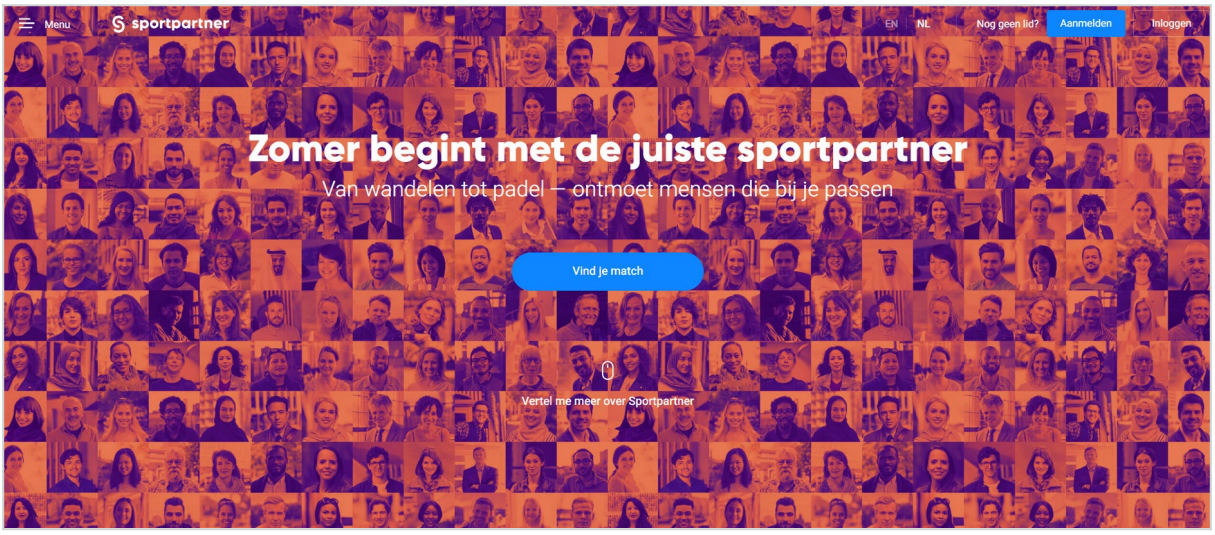

- **Document automation** – intelligent data extraction that posts invoices into the books automatically and accurately.
- **Real-time synchronization** – seamless connections with banks, payment gateways and tax authorities for automated reconciliation.
- **Management reporting** – intuitive dashboards that generate financial and tax reports in a few clicks.

IMPACT Deep capability in digitizing ERP/Finance systems with highly complex logic that demands precision and maximum security.

Sportpartner

sportpartner.com

THE NETHERLANDS
EUROPE

Europe's leading sports partner matching platform

Sportpartner is a large-scale social and community platform for which Infodation is responsible for development and system optimization. It connects people who share a passion for sports – walking, cycling, tennis, golf and more. The leading platform in its segment in the Netherlands, it has expanded to several European countries with **millions of active members**.

CORE SOLUTIONS

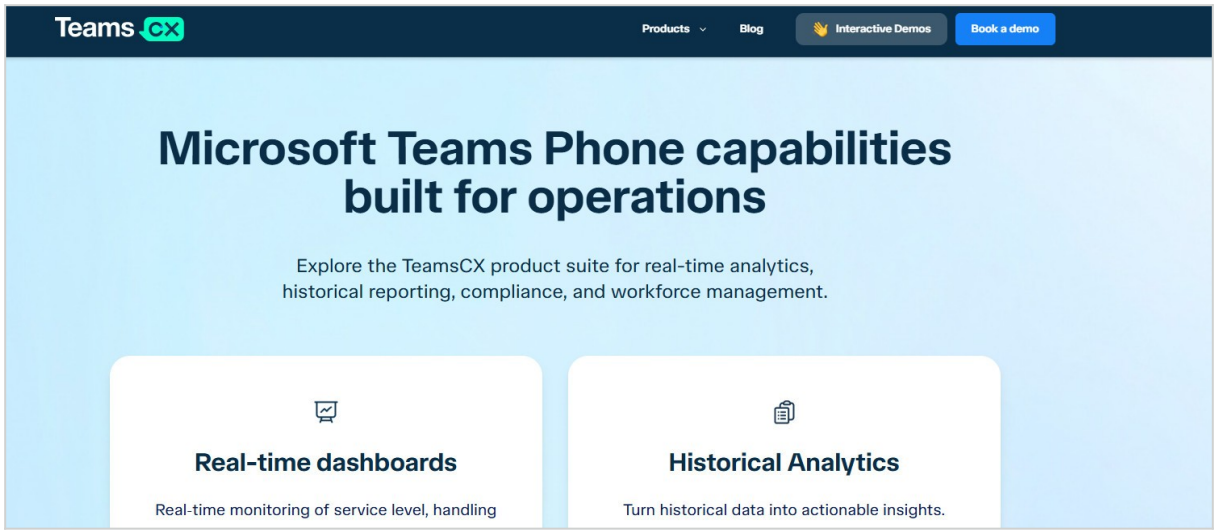

- **Smart matching algorithm** – suggests suitable partners by location, interests, age and sports level.
- **Performance & high scalability** – handles very high concurrent traffic and securely stores the personal data of millions of accounts.
- **Seamless cross-platform experience** – chat, groups and event management, reliable on Web and Mobile.

IMPACT Proven experience operating high-load B2C platforms with low latency – meeting Western European standards.

TeamsCX

teamscx.com

UNITED STATES

All-in-one contact center platform integrated with Microsoft Teams

TeamsCX is a modern SaaS contact center platform developed end-to-end by Infodation. It turns Microsoft Teams into a professional **omnichannel** customer engagement hub – without complex hardware – helping businesses optimize operational performance.

CORE SOLUTIONS

- **Native MS Teams integration** – direct connection to Teams Phone for call orchestration and intelligent routing inside Teams.
- **Real-time reporting** – dashboards that monitor agent KPIs and call quality to optimize customer experience (CX).
- **Automation & AI-ready** – intelligent IVR and ready integration with AI Agents.

IMPACT A pioneering position in Unified Communications and complex Middleware – with the High Availability large enterprises require.

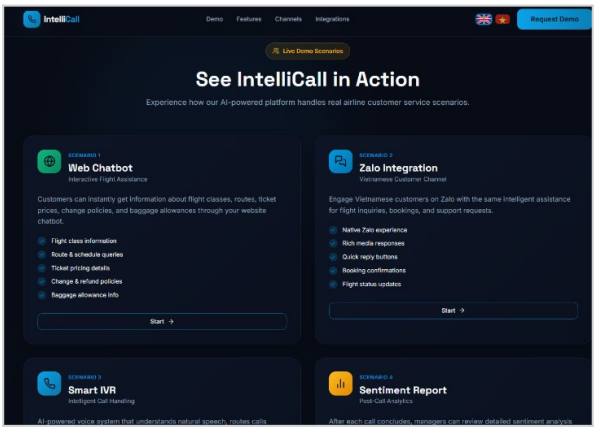

07 / 08

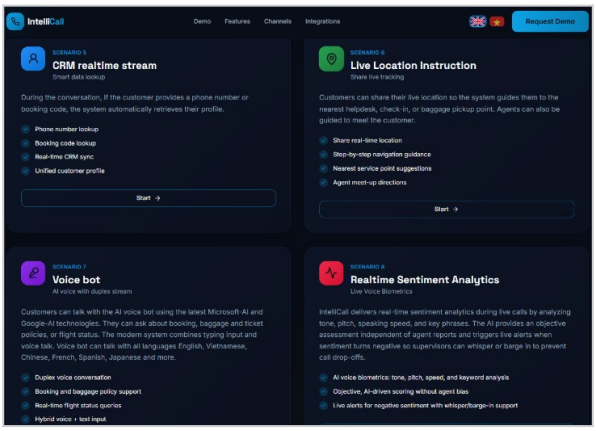

AI Solutions

Proprietary AI solutions that turn cutting-edge research into measurable business results.

AI Voice Bot Assistant

VOICE AI · LLMS

Combines Unified Communications and AI to create an intelligent, real-time voice channel between businesses and their customers.

40–60%
lower call center operating budget

Real-time
continuous conversations, no waiting

Live
transcription & sentiment analysis

CORE TECHNOLOGY

Integrates **Google Audio Streaming** with large language models (LLMs). Live audio streams are processed continuously, so the assistant understands context instantly and responds in natural language without delay.

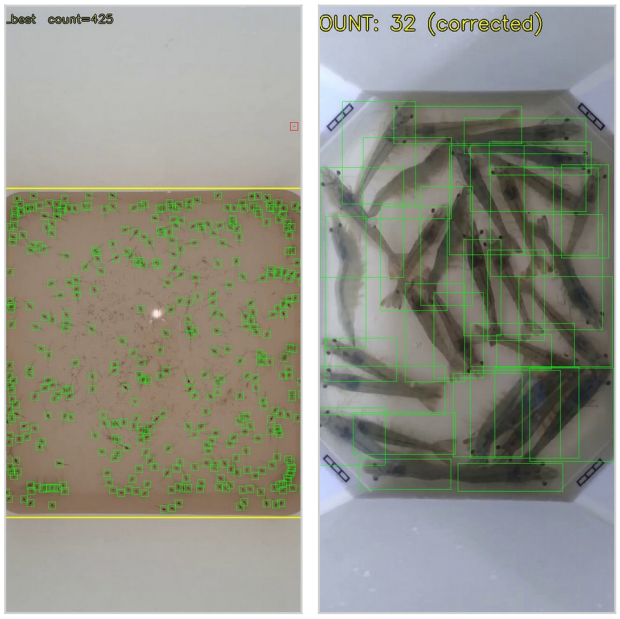

BREAKTHROUGH VALUE

- **Real-time interaction** — continuous streaming keeps conversations smooth and natural.
- **Business process automation** — appointment scheduling, order lookups and FAQ answering, handled entirely by voice.
- **Cost optimization** — cuts up to **40–60%** of a traditional call center's operating budget.
- **Smart management** — automatic transcription and customer sentiment analysis for real-time reporting.

IMPACT A lean contact center that delivers maximum performance at minimum cost.

Shrimp Larvae Counting

AQUACULTURE
COMPUTER VISION

A Computer Vision solution that automates counting, eliminates manual errors and digitizes data for the aquaculture industry.

95–99%
counting accuracy

< 10 s
per count, with density results

50%
operating time saved

CORE TECHNOLOGY

Deep Learning and image recognition models analyze and accurately count high-density shrimp larvae in real time.

BREAKTHROUGH VALUE

- **High accuracy** — 95–99%, eliminating the subjectivity of manual visual counting.
- **Ultra-fast processing** — counting and density results in under 10 seconds.
- **Workforce optimization** — faster warehouse intake/dispatch and packing.
- **Transparent data** — results and evidence images stored in the Cloud for instant traceability.

AI Document Scanning

COMPUTER VISION
OCR

Computer Vision and Optical Character Recognition (OCR) convert paper documents into digital data — automatically and accurately.

90%	99%+	50–70%
process automation	extraction accuracy	lower document storage costs

CORE TECHNOLOGY

Combines Computer Vision and advanced OCR to extract data from complex documents and invoices, automatically classifying and cleaning images for optimal recognition.

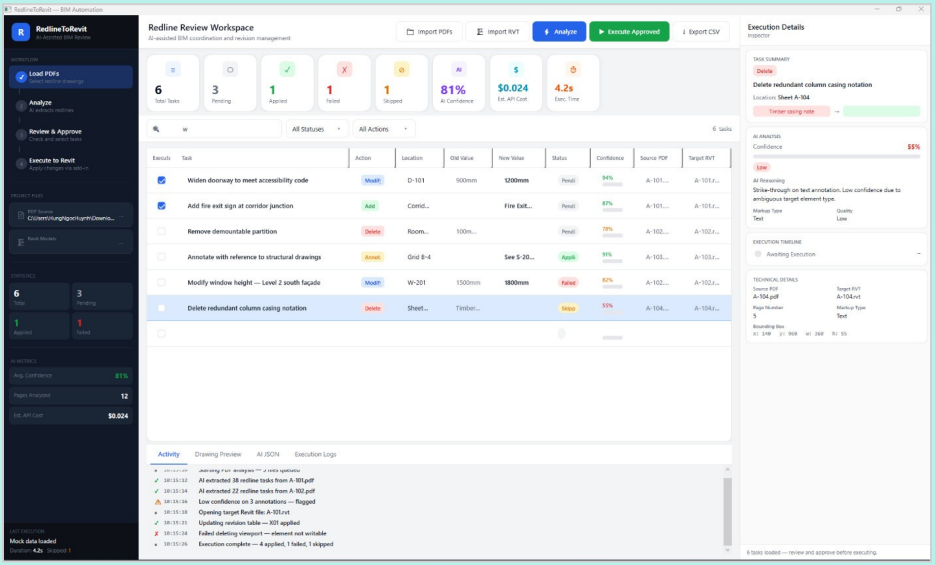

BREAKTHROUGH VALUE

- **90% process automation** — replaces manual data entry for large document volumes.
- **Accuracy** — extracted data matches the originals, minimizing human error.
- **Cost optimization** — up to 50–70% less spent on traditional archiving.
- **System integration** — data synchronized directly to ERP/CRM for instant search and use.

IMPACT Physical archives become searchable digital data — for faster operations and data-driven decisions.

AI Construction Drawing

BIM · AUTODESK & BENTLEY API

Computer Vision and specialized APIs automate drawing review (RedLine Markup) and convert 2D drawings into 3D models for BIM projects.

40–60%
less time on review, approval & modeling

2D → 3D
automated modeling in Revit & AutoCAD

Auto
RedLine markup of design errors

CORE TECHNOLOGY

Leverages the **Autodesk API & Bentley API** with Computer Vision algorithms to interpret geometric structures, extract data layers and detect design errors.

BREAKTHROUGH VALUE

- **Automated RedLine Markup** – detects clashes or deviations and marks error locations on the drawing.
- **Smart 2D-to-3D conversion** – builds Revit/AutoCAD models from traditional 2D drawings.
- **Productivity** – engineers and architects focus on design, not manual error checking.

IMPACT Fully digitized drawing workflows that catch errors at the design stage – before they reach the construction site.

AI-POWERED CYBERSECURITY

Anthropic Cyber Verification Program

ACCESS TIER

Defense Access

Since October 2026

Infodation participates in Anthropic's Cyber Verification Program at the Defense Access tier (as of October 2026), which enables our teams to use Claude models, including Claude Mythos 5.1, for defensive cybersecurity work in accordance with the program's terms.
