INTEGRATED SOFTWARE SOLUTIONS

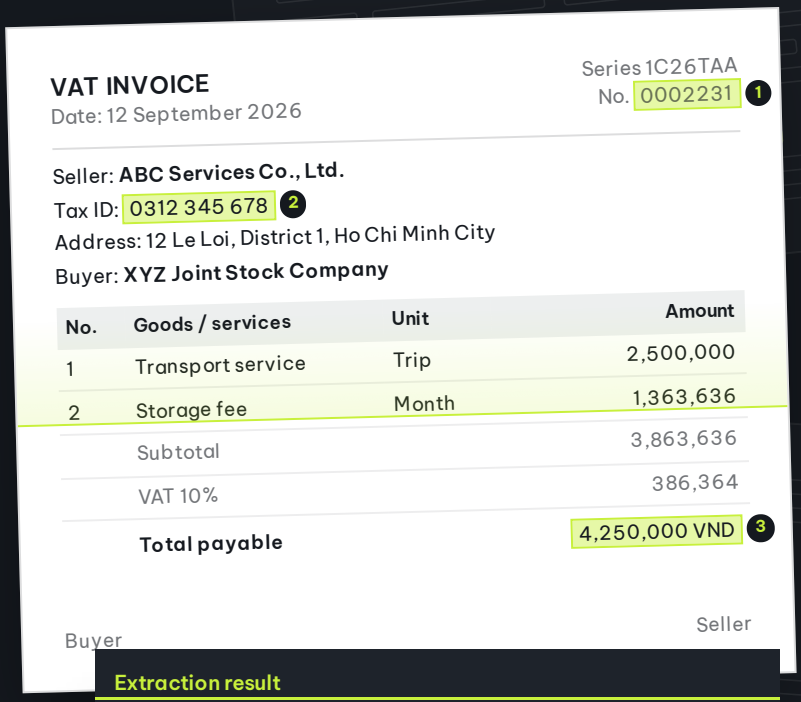

Solution Profile

AI document processing

IntelliDOC

Reads, extracts and cross-checks business documents, so your team no longer types them in.

IntelliDOC reads invoices, contracts, ID and company records and many other document types, captures exactly the fields you need, checks them against related documents, and sends the result straight into your business systems.

VAT INVOICE
Date: 12 September 2026

Series 1C26TAA
No. 0002231 (1)

Seller: **ABC Services Co., Ltd.**
Tax ID: 0312 345 678 (2)
Address: 12 Le Loi, District 1, Ho Chi Minh City
Buyer: **XYZ Joint Stock Company**

No.	Goods / services	Unit	Amount
1	Transport service	Trip	2,500,000
2	Storage fee	Month	1,363,636
	Subtotal		3,863,636
	VAT 10%		386,364
	Total payable		4,250,000 VND (3)

Buyer

Seller

Extraction result

Field	Value	Confidence
(1) Invoice number	0002231	99%
(2) Seller tax ID	0312345678	98%
(3) Total payable	4,250,000	97%

Cross-checked: subtotal + VAT = total payable

< 30 sec
per document, including human review

97–99%
extraction accuracy across 5,000+ sample invoices

8,373 hours
saved per year at a company with 3,000 sales staff, roughly the workload of 4 full-time employees

About Infodation

A European technology partner, with a team in Vietnam

Infodation is a software company headquartered in the Netherlands, with its development center in Nha Trang, Vietnam. For more than 17 years we have built and run software platforms for leading companies in Europe and the US, across telecom, energy, logistics and manufacturing.

IntelliDOC is built by Infodation's dedicated R&D and AI team to handle documents the way an experienced back-office clerk would: read any format, extract and cross-check the data, then deliver it into your systems.

17+	100+	ISO 27001	One Team
years serving international clients	specialists in the Netherlands and Vietnam	certified by TÜV NORD	Dutch–Vietnamese delivery model

Headquarters

Infodation B.V.

Tolnasingel 14, 2411 PV Bodegraven, the Netherlands

Development center

Infodation Vietnam Co., Ltd.

10th Floor, VCN Tower, 2 To Huu St., VCN Urban Area, Nam Nha Trang Ward, Khanh Hoa, Vietnam

Principles

Three principles for putting AI to work on documents

1

AI does the repetitive work

Reading, keying and cross-checking thousands of documents a day, instead of manual data entry.

2

People stay in control

Reviewers only check the fields the AI is unsure about, before anything is saved.

3

Consistent results

One standard for every document, regardless of who is working or which shift.

The problem

Documents in every format, still keyed in by hand

Accounting, procurement, legal, import–export and quality teams all lose hours every day to the same task: reading documents and typing them back into a system.

Manual data entry	Hours every day spent keying in figures, checking tax IDs and matching records.
Human error	Quality depends on each person's experience and attention to detail.
Every kind of format	Standard forms, phone photos, scans, handwriting, multiple languages.
New template, new rules	Rule-based systems must be updated and retested whenever a new document template appears.
More volume, more cost	The only way to keep up is to hire more people.

One invoice, eight manual steps

1	2	3	4	5	6	7	8
Receive	**Open file**	**Read**	**Key in data**	**Re-check figures**	**Match related documents**	**Fix errors**	**Save**

The three highlighted steps are where most errors happen: keying in data, re-checking figures and matching related documents.

300+ seconds
to process a single supplier invoice by hand

4,916 hours a year
spent just on keying in supplier invoices at one operating company (2025 figures)

The solution

How IntelliDOC handles a document

Instead of eight manual steps, IntelliDOC reads, extracts and cross-checks on its own. New templates are recognized automatically, with no new rules to write, and your existing accounting software and ERP stay exactly as they are.

1
Intake
PDF files, scans, phone photos

2
Read and classify
OCR combined with AI models identifies the document type

3
Extract
Captures the required fields, with a confidence score for each

4
Cross-check
Against purchase orders, goods receipts and partner records

5
Deliver
Standardized JSON into your ERP or applications via API

Applications

One platform for many departments

A fit for manufacturing, distribution, logistics, agriculture and services. Start with one process, measure the results, then expand.

Department	Documents	See
Accounting & Finance	Expense invoices, supplier invoices	Use cases 01, 02
Procurement	Invoices, purchase orders (PO), goods receipts	Use case 03
Legal & Administration	Contracts, annexes	Use case 04
Import–Export & Logistics	Bills of lading, customs declarations, C/O	Use case 05
Sales	ID cards, business licenses	Use case 06

One output for every department

Standardized JSON, delivered into your ERP or internal applications via API.

```
{ "doc_type": "contract", "expiry_date": "2027-03-31",
  "value": 1250000000, "needs_review": ["annex_02"] }
```

Use cases by department · 1/2

Accounting, finance and procurement

01

Accounting & Finance

Employee expense invoices

Measured in production

~~210+ sec~~ → **< 30 sec**

per invoice

Today

Meal, taxi and entertainment receipts arrive on paper or as photos; accountants key them in and check tax IDs by hand.

With IntelliDOC

Staff snap a photo; invoice number, date, tax ID and total are read and passed straight into the payment workflow.

Value

Faster reimbursement, and no manual entry for accounting.

02

Accounts payable

Supplier invoices in many templates

Measured in production

~~300+ sec~~ → **< 30 sec**

per invoice

Today

Hundreds of suppliers, each with its own template; every new template means new rules.

With IntelliDOC

The AI recognizes and captures the right fields on any template, with no rules to write.

Value

Add suppliers without adding processing cost; IT no longer maintains rules.

03

Procurement & Finance

Matching invoices to orders

Measured in the pilot

Discrepancies found, matching time

Today

Quantity and price mismatches between invoice, PO and goods receipt often surface only after payment.

With IntelliDOC

Automatic three-way match, with an alert to the owner before approval.

Value

No wrong payments; approvers only handle exceptions.

Use cases by department · 2/2

Legal, import–export and partner onboarding

04

Legal & Administration

Tracking contract deadlines

Measured in the pilot

Contracts digitized, extraction accuracy

Today

Contracts and annexes are scattered; expiry dates and obligations are easy to miss.

With IntelliDOC

Extracts terms, values and obligations, and sends a reminder before renewal.

Value

No missed renewals; the contract register is always up to date.

05

Import–Export & Logistics

Multilingual import–export documents

Measured in the pilot

Time per document set, correction rate

Today

Bills of lading, customs declarations and C/Os from many partners, in many languages; manual entry is slow and error-prone.

With IntelliDOC

Extracts from any format or language and delivers data in the structure your system expects.

Value

Faster clearance, fewer declaration errors, more shipments handled.

06

Sales & Procurement

Checking new partner documents

Measured in the pilot

Review time, mismatches found

Today

ID cards, business licenses and supporting papers must be compared by hand.

With IntelliDOC

Reads each document, cross-checks them and flags anything that doesn't match.

Value

Faster onboarding; staff only review flagged files.

How we work

Start small, measure on real documents

You provide sample documents and access to the systems to integrate. Infodation handles configuration, testing and operation, and measures results on your own documents.

Discovery

1–2 weeks

Map current processes and systems; review real documents and define the data to capture.

Pilot

3–4 weeks

Run on real data within an agreed scope; measure accuracy and processing time.

Rollout

After the pilot

Integrate with your systems and apps; train, support and extend the scope.

KPIs measured in the pilot

Field-level accuracy	Share of fields extracted correctly against the source document.
Processing time per document	From upload until the data is saved in your system.
Fields needing human review	Percentage of fields the AI is not confident about and a person checks.
Hours saved	Staff hours before and after, on the same document volume.

Before and after IntelliDOC

Manual

8 steps

210–300 sec per invoice

→

With IntelliDOC

3 steps

Upload, review, save · under 30 sec

Proven in production

Real numbers from a live deployment

The client is a company with 3,000 sales staff. All figures were measured by the client before and after IntelliDOC went live, not in internal testing.

Processing time per invoice

Employee expense invoices

210+ sec

under 30 sec

Supplier invoices

300+ sec

under 30 sec

Total processing hours per year (2025)

Employee expense invoices

4,605 h

657 h

Supplier invoices

4,916 h

491 h

Saved per year, 3,000-person sales organization

8,373 hours

7–10× faster per invoice. Eight manual steps became three (upload, review, save), and teams now capture extra data fields they previously went without.

System benchmarks

97–99%
extraction accuracy, measured on 5,000+ sample invoices

~5 sec
AI processing time per invoice, excluding human review

Thousands
of concurrent requests tested

Deployed in 6 countries

Vietnam, the Philippines, South Korea, Cambodia, Myanmar and India.

Data security

Your documents are your assets

We protect your data from the very first document and apply security standards throughout deployment and operation.

ISO/IEC 27001:2022

Information security management system audited annually by TÜV NORD.

NDA first

A non-disclosure agreement is signed before Infodation receives any document.

On-premise option

Can be installed on your own infrastructure; sample data is deleted after the pilot on request.

INFODATION
INTEGRATED SOFTWARE SOLUTIONS

Next step

Start with 60 minutes.

One session to understand how you handle documents today and to watch IntelliDOC process your own samples. Infodation then sends a pilot proposal with a clear scope, KPIs and cost.

1

A 60-minute conversation about your current document workflow

2

See IntelliDOC process your sample documents

3

Receive a pilot proposal with scope, KPIs and cost
