INFODATION
INTEGRATED SOFTWARE SOLUTIONS

AI voice agent

Solution profile

IntelliCALL

Turn every conversation into immediate action.

An AI voice agent that talks naturally in real time, speaks many languages, understands your business knowledge and completes tasks directly in your systems.

ASR | LLM + RAG | Physics-based TTS | ISO/IEC 27001

Multilingual

Serve international customers in their own language.

Real time

Natural, expressive conversation with no waiting.

Business integration

Acts directly in CRM, PMS and scheduling.

The problem we solve

Every missed call can be a lost customer

Whatever the industry, service businesses face the same problems at the voice touchpoint with customers.

Missed calls
Peak hours, evenings and weekends with no one to answer: lost customers, lost revenue.

Language barriers
International customers and partners aren't served in their own language.

Overloaded call center
Repetitive questions take up most of the team's time.

Inconsistent quality
The experience depends on each person's skills and mood.

Wasted conversation data
What customers say is never captured, analyzed or used.

IntelliCALL answers
A voice agent that's always on, multilingual, consistent and captures every call.

Calls don't stop at 5 pm. Evenings, weekends and peak hours are when customers are most often missed, and where IntelliCALL adds the most value.

INFODATION
INTEGRATED SOFTWARE SOLUTIONS

Use cases by industry

One voice agent, six real-world jobs

IntelliCALL is configured to each business's knowledge, processes and systems: it answers customers, looks up systems and completes tasks within the call. Conversations shown are illustrative.

Contact center

Order lookup and express upgrade

Customer
Why is my order DH2048 three days late?

IntelliCALL
It's at our Da Nang warehouse. Shall I upgrade it to express delivery before 11 am tomorrow?

✓ CRM lookup ✓ Order updated ✓ SMS sent

Meeting interpretation

Netherlands–Vietnam project meeting

Pieter, NL
Kunnen we de go-live verplaatsen naar de 15e?
Can we move the go-live to the 15th?

IntelliCALL, VI
Pieter hỏi: mình có thể dời go-live sang ngày 15 không?
Pieter asks: can we move the go-live to the 15th?

✓ Two-way interpretation ✓ Bilingual minutes

Travel and tours

Booking a Nha Trang–Da Lat tour

Customer
I'd like a 3-day tour for two this weekend.

IntelliCALL
Friday morning has seats, with hotel pick-up at 7 am. Shall I hold two?

✓ Seats held ✓ Zalo confirmation

Restaurants and F&B

Table booking with a dietary note

Guest, EN
Can I book a table for four tonight at 7 pm?

IntelliCALL
Confirmed by the window, David. I've noted a vegetarian guest.

✓ Booking created ✓ Reminder at 18:00

Hotels and resorts

Housekeeping request in Korean

Guest, KR
수건 두 장 더 주실 수 있나요?
Could I get two more towels?

IntelliCALL
네, 10분 안에 객실로 가져다 드리겠습니다.
Certainly, within 10 minutes.

✓ Housekeeping ✓ Room 1205

Smart clinic

Rescheduling a dental appointment

Patient
I'd like to move Thursday's appointment to next week.

IntelliCALL
Dr. Lam is free next Tuesday at 9 am. Shall I book that?

✓ Schedule updated ✓ Reminder the day before

Use cases by industry

Inside two real conversations

Scenario 1 A 23:15 call to a resort hotline

Incoming call, resort hotline 23:15

Guest, EN
Hi, can I book a car to the airport at 5 a.m. tomorrow?

IntelliCALL
Of course, Mr. Tanaka. A car for room 1208 at 5:00 a.m. Would you like breakfast boxes for the trip?

Guest, EN
Yes, two please.

IntelliCALL
All set. You'll receive an SMS confirmation shortly. Have a good night!

Behind the call

1. **Language detection**
   English; switches service context
2. **Intent detection**
   Airport car plus breakfast to go
3. **PMS lookup**
   Room 1208, guest name, check-out date
4. **Create service requests**
   Sent to Concierge and F&B
5. **Notify and log**
   SMS confirmation, CRM log, sentiment positive

Outcome The request is fully handled within the call; night staff only receive standardized tasks.

Scenario 2 A Netherlands–Vietnam project meeting

Online meeting, live subtitles and voice interpretation

P **Pieter, Amsterdam** NL
Kunnen we de go-live verplaatsen naar de 15e?
Can we move the go-live to the 15th?

L **Lan, Nha Trang** VI
Được, nhưng mình cần chốt UAT trước thứ Sáu.
Yes, but we need to close UAT before Friday.

P **Pieter, Amsterdam** NL
Akkoord. Ik pas het releaseplan aan.
Agreed. I'll update the release plan.

Bilingual minutes, NL–VI

Decision
Go-live moved to the 15th, provided UAT closes before Friday.

Action items
- ☐ Lan: close UAT before Friday
- ☐ Pieter: update release plan

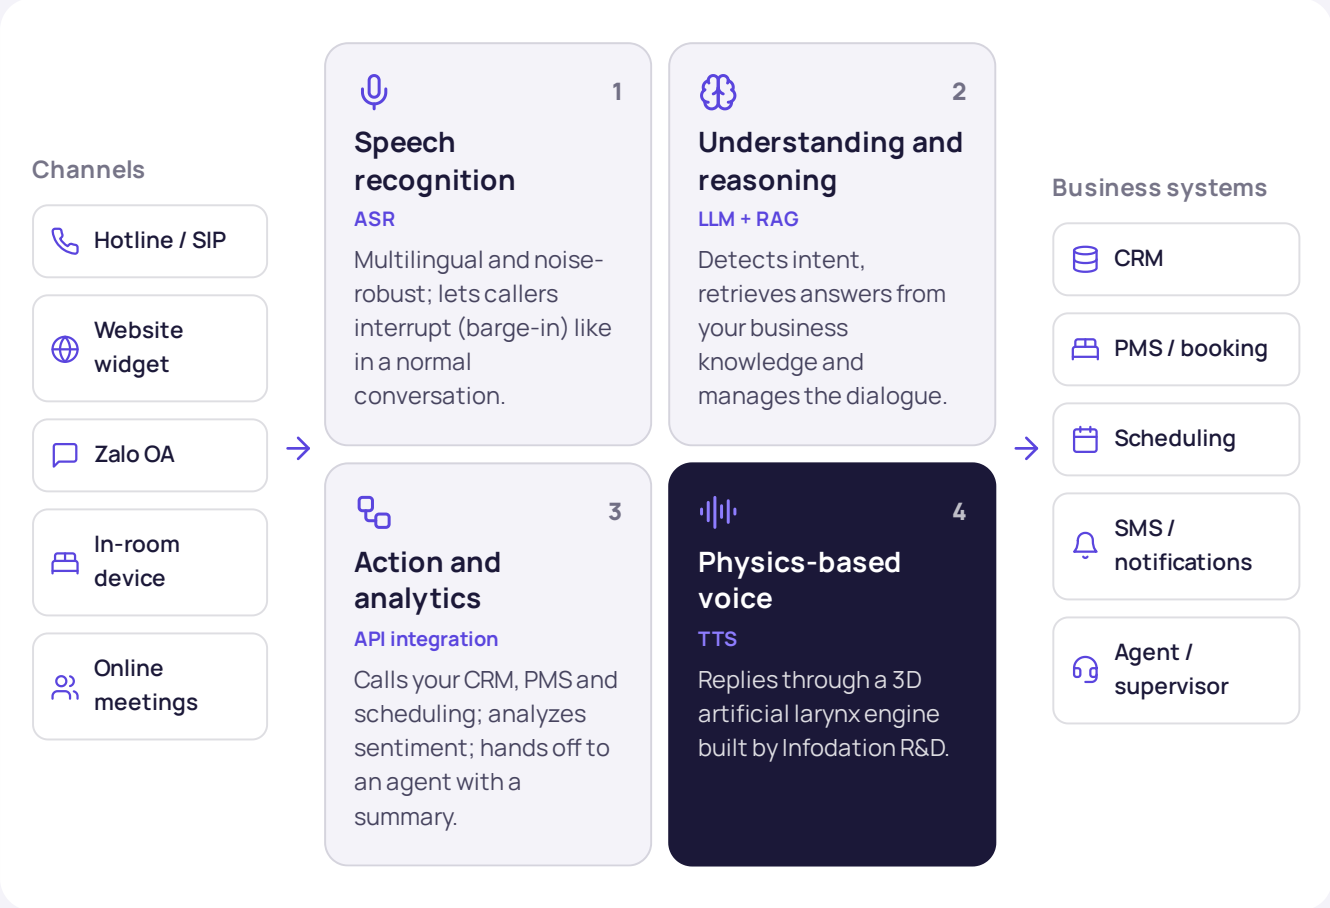

- Speaker diarization
- Two-way speech interpretation
- Full, searchable transcript
- Minutes sent by email or Teams

Outcome Everyone speaks their own language, decisions are made in the meeting and no one has to write minutes.

Technology platform

A complete voice agent, from speech to action

From the moment a customer speaks to the task being completed in your systems, every step runs inside one platform.

You control the knowledge. Services, policies, prices and FAQ are provided and managed by you, so answers always follow official information.

Running alongside every call

Sentiment analysis

Each call is scored as it happens, so unhappy customers are flagged early.

Transcript and summary

A searchable record of every conversation, with the key points summarized.

Agent handoff

When a human is needed, the call moves to your team with full context attached.

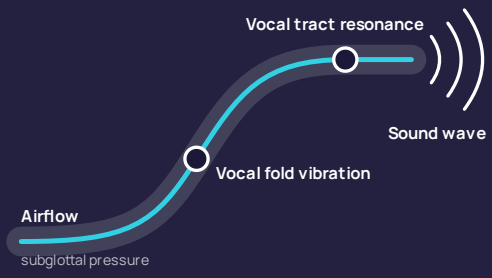

Technology platform

Physics-based voice: what sets IntelliCALL apart

Most TTS systems still show phase artifacts, lack nuances like breath and rasp, and are costly for low-latency full-duplex conversation. IntelliCALL takes a different approach.

Conventional TTS versus IntelliCALL

Conventional neural TTS	**Text** input	**Acoustic model** Tacotron, FastSpeech	**Mel-spectrogram** spectral features	**Neural vocoder** WaveNet, HiFi-GAN	**Audio** phase artifacts
IntelliCALL	**Text** + prosody targets	**Kinematic mapping** lightweight network	**Physical parameters** pressure, tension, shape	**3D larynx** physics simulation	**Natural voice** rich in nuance

Context-aware expressive voice

Cheerful

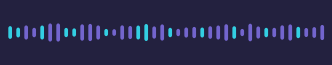

Empathetic

Serious

Breath, rasp

Instead of predicting audio samples directly, IntelliCALL simulates how humans actually produce speech, so the voice shifts naturally with content and emotion.

−38%
end-to-end speech synthesis latency (internal test, 2026)

Fewer artifacts
markedly fewer neural-vocoder phase artifacts

Stable
in crowded, noisy environments (ITE HCMC 2026)

Figures from internal tests by Infodation R&D. Metrics on your real scenarios and infrastructure are measured and confirmed during the pilot.

How we work

Start small, measure on your own calls

A short, low-risk path from first conversation to full rollout, with results measured on your real calls before you scale.

You provide

Business knowledge (services, policies, prices, FAQ) and access to the systems to integrate.

Infodation handles

Configuration, integration, testing and day-to-day operation of the voice agent.

1 Discovery — 1 week

- Analyze call scenarios, knowledge and existing systems
- Measure baseline metrics
- Working demo on your own workflow

2 Pilot — 2–4 weeks

- Run on one channel or scenario
- Evaluate against agreed KPIs

3 Scale — Per scope

- Extend scenarios, channels and integrations
- Training and operational support

Pilot KPIs agreed with you

Containment rate
Share of calls fully resolved by IntelliCALL without a human agent.

Missed-call rate
Share of incoming calls that go unanswered.

Wait time
How long a caller waits before being answered.

Handling time (AHT)
Average time needed to handle one call from start to finish.

CSAT
Customer satisfaction score collected after the call.

Baselines are measured during Discovery, so every result is compared with your own numbers.

What you gain

24/7
No missed calls at peak hours, evenings and weekends.

Multilingual
Serve international customers in their own language.

1-week demo
On your own workflow, during Discovery.

Proven in practice

More than a demo

IntelliCALL is used every day inside Infodation and has run live at an industry trade fair.

Live at ITE HCMC 2026

30+

visitors asked for a follow-up after hearing it live. The system ran reliably in a crowded, noisy trade-fair hall.

Used daily at Infodation

Interpreting meetings between the Dutch and Vietnamese teams under the One Team model.

Hear it yourself

infodation.ai/intellicall

Ready to deploy for

- Contact center
- Meeting interpretation
- Travel and tours
- Restaurants and F&B
- Hotels and resorts
- Smart clinic

Results on your own scenarios are measured and confirmed during the pilot, against KPIs agreed by both sides.

Data security

Your conversations are your assets

We protect your data from the first call and apply security standards throughout deployment and operation.

ISO/IEC 27001:2022

Information security management system, audited annually by TÜV NORD.

NDA first

A non-disclosure agreement is signed before we receive any conversation data.

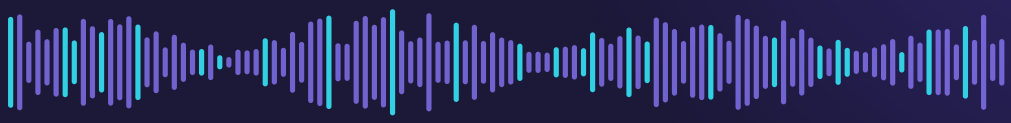

On-premise option

Deploy on your own infrastructure; sample data is deleted after the pilot on request.

INFODATION
INTEGRATED SOFTWARE SOLUTIONS

Next step

Start with 60 minutes.

A 60-minute session to understand your current conversations and hear IntelliCALL handle your own scenarios. Infodation then sends a pilot proposal with clear scope, KPIs and cost.
